With a wide portfolio of reliable and competitive cable solutions for international customers, the Cablel Hellenic Cables Group is one of the largest cable producers in Europe. The Group manufactures power, telecommunication and submarine cables, as well as enamedled wires and compounds.

The Cablel Hellenic Cables Group represents the cable production and marketing sector of Viohalco SA. The Company started its activities in 1950 as a Viohalco plant and in 1973 was incorporated as an independent subsidiary under the name Hellenic Cables, expanding its production and trade operations. Today, the Cablel Hellenic Cables Group consists of Hellenic Cables S.A. which operates three plants in Volia, Greece that produce cables, enamedled wires and plastic and elastomer compounds; the Fulgor S.A. plant in Corinth, Greece, which manufactures power cables, power and fibre optic submarine cables and copper wires; Icmie Ecab S.A., a power and telecommunication cable manufacturer in Bucharest, Romania and Lesco Ltd Blagoevgrad, Bulgaria which manufactures wooden reels and pallets.

With a strong export orientation and focus on development of value added products, such as high and extra-high voltage cables and submarine cables, the Group implements significant investments towards enriching its product portfolio and enhancing its sustainability profile. The Company implemented a EUR 60 million approximately investment plan for the manufacture of high-voltage submarine cables in Fulgor’s plant.

The Company’s wide product range, which is sold internationally under the Cablel® trademark, extends to PVC, EPR and XLPE insulated power cables (rated up to 500kV), marine and low smoke halogen free cables, fire resistant cables, telecommunication, signal and data cables with copper conductors or optical fibres, as well as fire retardant halogen free plastic and elastomer compounds and enamedled wires. Wires and cables are supplied to a variety of international standards, such as VDE, CEI, ICEA, NF, SEN, BS, UL, NEMA, JIS, ASTM, DIN and ELHT. Many of the Company’s products are certified by BASEC, VDE, IMQ, NF-USE, NETWORK RAIL, KEMA, DNV and UL.

All Cablel® enamedled wires are manufactured and tested to the IEC 60317-0-1 standard; customers may also request any other recognised international standard.

Technical know-how is combined with continual investment in state-of-the-art machinery, to ensure levels of efficiency and quality which meet the strictest standards. The Company’s Quality Management System is certified to ISO 9001:2008, its Environmental Management System to ISO 14001:2004 and its Occupational Health and Safety to OHSAS 18001:2007. Cablel Hellenic Cables Group has the necessary expertise to develop and offer turnkey solutions that meet specific demands of its customers.

Commitment to quality and sustainable development has been a key factor in enabling Cablel Hellenic Cables Group to establish a strong market position internationally.

The Company’s highly experienced technical and managerial staff have a strong commitment to innovation, technological excellence and outstanding quality, which ensures that users of Cablel® products have made a reliable choice.

The Cablel Hellenic Cables Group aims to constantly improve its offering and respond swiftly to changes in customer requirements around the world with reliable and safe products, based on environmentally-friendly technologies. At the same time, the Group places strong emphasis on the development of its people and the creation of value for its shareholders, partners and the communities in which it operates. Looking ahead, the Group plans additional investments in technology and innovative cable solutions, as a way of contributing to the creation of a sustainable future for its stakeholders.
The Hellenic Cables Group offers a wide range of cables for the oil and gas industry, which comply with national and international standards (BS, IEC, NEK, etc).

- Telecommunication (Copper up to 7+ category and fibre optic), instrumentation and control, low, medium and high voltage cables customised for the oil and gas industry requirements.

- Medium and high voltage submarine cables, fibre optic submarine cables and composite submarine cables containing power cores, optical fibre and control elements.

Our advanced technology and know-how combined with our flexibility, ensure that our products are designed, manufactured to the highest quality standards and marketed with the perspective to fully support customers' special requirements.

Hellenic Cables S.A.
Fulgor S.A.
ICME ECAB S.A.
Optical fibre submarine cables

Medium/High Voltage AC and Composite power/optical fibre submarine cables

A variety of cables and accessories are available to support a wide range of applications.
The offshore cable group offers a wide range of cables customized for the requirements of the oil and gas industry, which comply with national and international standards (IEC, UL, NM, etc.).

- Temperatures in operation up to 70°C category
- Flame-retardant cables
- Both unshielded and shielded cables
- Low-voltage cables
- Medium-voltage cables
- High and extra-high voltage cables

Our products meet the following requirements:
- Corrosion resistance
- Fire resistance
- Environmental performance at four temperatures
- Mechanical and environmental resilience
- Abrasion-resistant mechanical protection

Protection in aggressive environments, where the highest impermeability to hostile media is required, can be achieved by:
- Polyethylene sheaths
- Corrugated or smooth longitudinal extruded armour sheath.
FUTURE OUTLOOK

The Group product development strategy in the existing facilities includes:

- DNV subsea modules
- Subsea manifolds
- DNV Subsea modules
- DNV Subsea modules
- Subsea manifolds
- Subsea modules
